

AP EXAM REVIEW

AP Exam Review is an online test preparation resource that prepares students for the College Board Advanced Placement exams. Like other test prep resources, AP Exam Review helps students to understand what to expect on exam day and provides opportunities to practice questions typical of those found on the exam.

Taking test preparation further, AP Exam Review incorporates a diagnostic-prescriptive capability and primary instructional content. Diagnostic assessments provide a way for students to determine their own level of proficiency. Personalized study plans prescribe specific online resources to help students to focus their study efforts.

INDIVIDUALIZED FOR EVERY STUDENT

AP Exam Review begins by identifying a student's strengths and weaknesses. Computer-scored online diagnostic assessments are aligned to the College Board's exam topics and assess student knowledge on each topic covered on the AP exam. Students can immediately see how well they performed on each topic and can quickly identify where they need to spend more time.

Next, a personalized study plan is generated based on performance on the diagnostic tests. The study plan directs each student to relevant material to address identified areas of weakness.

HIGHER LEVELS OF PROFICIENCY

Proven instructional resources drawn from Apex Learning's online AP Courses guide students in study and practice to reinforce skills and deepen conceptual understanding. Multimedia tutorials offer opportunities for students to master difficult concepts. Interactive activities motivate students to invest more time in their preparation.

Directions for student access:

1. Access the website <http://apexvs.com>
2. Enter the username and password provided by your teacher.
3. Click button 
4. Enter the enrollment code:  and SUBMIT
5. Select your course and click SUBMIT
6. Go to MY SCHOOL to access your course.
7. Review test taking tips.
8. Take the Diagnostic Test  to generate an individualized study plan. These study plans will be available at any time to help you study for the topic.
9. Review items in Appendix A and peruse the previously-released test questions from College Board.
